

Study in Australia by joining our global community of pioneering minds

Murdoch
UNIVERSITY

Murdoch provides everything you would expect from a world-class university, including leading academics, world-changing research, excellent facilities and a wide range of courses. But it's our ethos that sets us apart and has led to Murdoch becoming the place where new ways of thinking can be found. We won't tell you what to think - instead we give you the support, skills and opportunities to forge your own path.

A postgraduate degree from Murdoch can help you to expand on your bachelor's degree and gain new insights to complement your professional development. Our courses offer a mixture of theory and practical work, providing opportunities to undertake industry work placements or complete real-world projects for industry partners in your field.

Whether you're looking for a career change, building on an already established skill set, or want to take the next step in your career, Murdoch will give you the structure, support and space you need to push yourself to where you want to be.

Murdoch University Research Institutes

Murdoch has always been a research-led University. Since our inception in 1973, we have encouraged both our academics and students to challenge what is considered normal and to continue to grow as they explore a range of new, exciting, and never before examined concepts and ideas. At Murdoch, our researchers are providing solutions to global challenges through innovation and inspired thinking.

The Harry Butler Institute

Partnered with global energy producer Chevron, The Harry Butler Institute champions a research space where community, business and biodiversity can co-exist; and where efforts integrate and balance the needs and aspirations of all three sectors.

Food Futures Institute

Murdoch University was founded in 1973 on a strong agricultural base, and we continue to deliver real innovations and improvements for our industry and government partners, both in Western Australia and around the world. The Food Futures Institute promotes sustainable use of our limited land and water resources to economically and ethically improve food, forestry and fibre production.

Health Futures Institute

The Knowledge and Health Precinct developing in and around our Perth campus provides unique research opportunities supporting our activities in health, biomedicine, bioinformatics and other fields including health education, communication and health sector management policy.

Murdoch has over 250 undergraduate, postgraduate and research courses available, spanning the areas of Agriculture, Education, Engineering, Design, Healthcare, Information Technology, and Public and Business Administration.

Why choose Murdoch?

→ Ask anyone who's studied here,
the Murdoch experience is
one of a kind!
